

Shubham Kushvanshi

Full Stack Developer

shubhamkushvanshi@gmail.com | linkedin.com/in/shubham-kushvanshi | github.com/Kushvanshi-Shubham

Professional Summary

Full Stack Developer with experience building enterprise-scale procurement platforms, AI-powered applications, SAP integrations, and high-volume data engineering pipelines. Skilled in designing scalable backend systems, real-time synchronization services, REST APIs, and cloud deployments using React, Node.js, TypeScript, PostgreSQL, Supabase, Snowflake, Azure, and SQL Server. Passionate about building reliable, production-ready software with clean architecture and measurable business impact.

Technical Skills

Languages: JavaScript, TypeScript, SQL, Python

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn UI, Ant Design

Backend: Node.js, Express.js, REST APIs, JWT, Prisma, Mongoose, Supabase Edge Functions, Deno

Databases: PostgreSQL, MongoDB, SQL Server, Snowflake, Redis

Cloud & DevOps: Azure ACR, IIS, Cloudflare R2, GitHub Actions, Supabase Realtime

Enterprise: SAP RFC, SAP OData, ETL Pipelines, Data Engineering, WebSockets, Microservices, Git, Postman

Professional Experience

V2 Retail Pvt. Ltd.

Sept 2024 – Present

IT Developer / On-site, Gurugram

- V2 SRM Portal:** Built and scaled a production-grade Supplier Relationship Management platform connecting 200+ vendors with buyers, QC teams, and category managers. Automated the complete procurement lifecycle including Purchase Orders, ASN, Quality Control, Goods Receipt (GRC), and TNA milestone tracking. Architected over 150 Supabase Edge Functions handling 260K+ SAP records and integrated 5+ SAP RFC modules. (*Technologies: React, TypeScript, Node.js, PostgreSQL, Cloudflare R2, Supabase Realtime, SAP RFC, WhatsApp Business API*)
- Data Engineering (SAP to Snowflake):** Built Python ETL pipelines extracting SAP S/4HANA data using OData and RFC APIs into Snowflake BRONZE layer covering 25+ tables and over 700 million rows. Successfully loaded transactional datasets exceeding 300 million rows with complete reconciliation. Developed high-performance bulk-loading pipelines capable of importing 3.5M rows in under one minute. (*Technologies: Snowflake, SQL, Python, Pandas, SAP OData, SAP RFC, GitHub Actions*)
- PO Wise Wardrobe:** Designed and implemented a Purchase Order planning module integrated directly with SAP. Built RBAC approval workflows and developed an Open-To-Buy budgeting dashboard with Excel bulk upload and SAP write-back integration. (*Technologies: React, TypeScript, Express.js, PostgreSQL, SAP RFC APIs*)
- Azure DAB Deployment Manager:** Built a comprehensive web platform for managing Azure Data API Builder entities with CRUD operations, deployment automation, and SQL Server synchronization. Automated Docker image builds to Azure Container Registry (ACR) and deployed production releases on Windows Server using IIS. (*Technologies: Node.js, Express.js, Azure Data API Builder, Azure ACR, IIS, SQL Server*)

- **AI Fashion Attribute Extractor:** Developed a full-stack AI-powered platform for managing fashion product hierarchies and automated attribute extraction. Built complete CRUD administration panels with JWT authentication, RBAC, Redis caching, and scalable REST APIs. (*Technologies: Express.js, Prisma, PostgreSQL, Redis, React, TypeScript, Ant Design*)

IndiGG

Nov 2022 – May 2023

Beta Tester / Remote

- Tested pre-release Web3 games by identifying functional bugs, usability issues, and gameplay inconsistencies.
- Collaborated with development teams by providing structured feedback, contributing to product quality improvements during multiple beta releases.

Personal Projects

- **BrainTox:** Built a secure second-brain knowledge management platform featuring JWT authentication, content sharing, link management, and responsive dashboards. (*Technologies: React, TypeScript, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, Shadcn UI*)
- **RBAC Configuration Tool:** Developed a role-based access management application enabling administrators to manage users, permissions, and authentication using Supabase. (*Technologies: Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Shadcn UI*)
- **Realtime Chat Application:** Built a real-time chat application using WebSockets with JWT authentication supporting instant messaging between connected users. (*Technologies: React, TypeScript, Node.js, Express.js, WebSockets*)
- **MiniPaytm:** Developed a digital wallet application simulating secure financial transactions with authentication, balance management, and money transfer functionality. (*Technologies: React, Node.js, Express.js, MongoDB*)

Education

IILM College of Engineering & Technology, Greater Noida

Bachelor of Technology (Computer Science)

Certifications

- Full Stack Web Development — Udemy
- Full Stack Web3 Development — Udemy
- Ethereum Blockchain Developer — Udemy
